

KALMIA

Slovenia

K A L M I A

Helping businesses thrive.

Kalmia d.o.o. is a development company that helps companies thrive through digitization with digital solutions tailored to their individual needs. We create solutions to upgrade and connect data from existing systems, enabling data connectivity and management from one location. With the use of new technologies like blockchain and AI, we introduce added value to the customer.

Security

PRODUCT DESCRIPTION / SOLUTION

A secure and user-designed central web application that monitors, manages and shares all important project information across involving partners. This is a multilevel, blockchain-based application that manages and controls project status, timeline, costs, documentation and requirements for the faster, more effective and automated exchange of project data.

DIFFERENTIATION

- What makes our product different:
- Easy to use;
 - Strong emphasis on data sharing capability between partners;
 - Strong data security (blockchain);
 - Support for various data sources.

UNIQUE SELLING PROPOSITION

- Individual and end-to-end approach;
- Short learning curve for system users;
- Customization of sharing experience;
- Data security layer provided by blockchain technology.

HOW DOES YOUR COMPANY CONTRIBUTE TO SUSTAINABILITY

Product information helps customers make more sustainable choices. Centralized and secure data allows the yachting industry to prove the sustainability of used materials and the production process.
